

# MANAGED ENDPOINT SECURITY

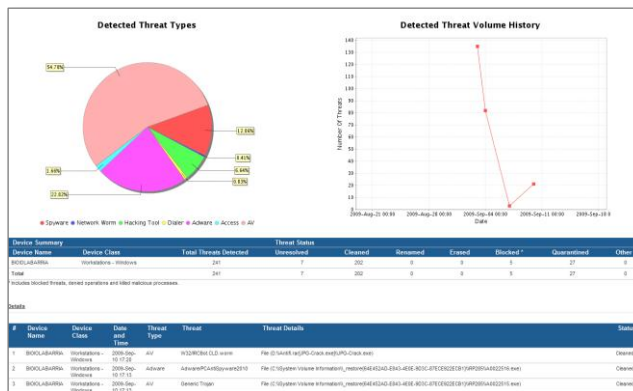

## Total Security for Your Business

# ENTERPRISE SECURITY for SMBs

**95% of small and midsize businesses have an antivirus installed, but 74% still experienced threat protection failures last year!**

### Threats facing SMBs today

- Email worms
- Network viruses
- Spyware
- Data theft
- Email spam and malware

### Benefits of Endpoint Security

#### Fully managed protection for a price comparable to your current antivirus!

We include enterprise class end point software, monitored by us 24/7, and supported by expert technicians. Regular reports are available to show how well you are protected!

#### Reduced operating costs

Security threats prevent you from being as productive as possible at work. This costs the company a lot of money through lost productivity and missed opportunities. We prevent those issues that are avoidable, saving you time and money!

#### Protection for your company's critical assets and information

Proactive technologies provide faster response and additional protection against all types of malware, Internet attacks and threats.

#### A flexible security solution

Our wide variety of advanced security features offer the right security level for any size company and network.

#### Information is key!

You can be sure of your protection. If you wish, we'll provide you with periodic reports that keep you informed about threats prevented and your safety level!

#### Peace of Mind

It is no longer about buying an antivirus solution, installing it, and then hoping it works. Now you can rest assured that your information is safe knowing that there are group of experts taking care of it for you. All this is included in the monthly price!

### KEY FEATURES

#### Enterprise Class Solution

Encompassing more than just an antivirus, this solution supports full endpoint security.

#### Advanced Proactive Technology

Well recognized proactive technology, composed of intrusion prevention, proactive detection and behavioral analysis

#### Anti-spam for desktops

Based on Recurrent Pattern Detection, a content-agnostic technology detects and blocks spam in any language

#### Mobility Protection

Allows even laptops outside of the business network to be fully protected.

#### Full Awareness Through Reporting

A wide range of detailed reports can be provided regularly so you know what is happening and that you are protected.

#### Fully Monitored System

Your threat protection is monitored 24/7 to verify it's status. Immediate action is taken if there is a protection failure!

**"Almost 50% of SMBs shut down external network access during serious external attacks; for many SMBs, this can cause crippling revenue loss" - Gartner**

## Why our Clients Choose Managed Endpoint Security!

### Comprehensive Endpoint Security:
